

Making a Mold

- 1) Mix equal amounts of white and yellow Amazing Mold Putty.

- 2) Press the mixed putty over your sculpted piece.

- 3) Wait 20 minutes for the putty to cure, then remove from the sculpture. You are now ready to reproduce your sculpture.

- 4) Use your mold over and over to create a wide variety of colors and designs.

Painting

Note: Thin all paints with Rust-Oleum® Varathane interior water based polyurethane instead of water.

DecoArt
Always the Best!

- 1) Select your choice of premium Deco Art paints.

- 2) Make a mixture of black, gold and Varathane and apply it to the face. Then wipe off the excess and allow to dry.

- 3) Apply the gold to the eye lid just like you would eye makeup. On the cheeks and chin apply a small dab of the red mixture and then wipe off most of it to create a rouge look. Use a liner brush to put in the whites of the eyeballs. Apply the red mixture on the lips like it is lipstick leaving a space for the teeth.

- 4) Allow to completely dry and then apply the finishing touches such as the lavender eye shadow, eyeliner, pupils, and beauty mark.

- 5) Add hair and you are done!
